PROFILE SUMMARY

Product Designer with 4+ years of experience designing B2B SaaS platforms, dashboards, and workflow-driven applications. Specialises in translating complex business logic into scalable UX systems, with hands-on experience shipping AI-powered products across fintech, mobility, and trust-tech verticals. Proficient in end-to-end product design — from user research and wireframing to prototyping, design systems, and developer handoff in Figma. Comfortable working cross-functionally with engineering teams in agile environments across multiple time zones.

CORE SKILLS

Design: UX/UI Design · User Research · User Interviews · Wireframing · Prototyping · Interaction Design · Responsive Design · Information Architecture · Usability Testing · Design Systems · Component Libraries · Dashboard & Data Visualisation UX · Workflow & Automation Interface Design

Tools: Figma · FigJam · Adobe CC · Jira · ClickUp · AI Product Design · Prompt-to-Workflow Mapping

Practices: Agile / Scrum · Cross-functional Collaboration · Stakeholder Workshops · Product Strategy · B2B SaaS UX Architecture · Developer Handoff

EMPLOYMENT HISTORY

Product Designer — [NidiDrive](#)

Nov 2024 – Present

Lagos, Nigeria (Remote-Ready)

- Designed end-to-end UX for a ride-hailing platform including car-owner app, rider app, and driver-facing interface — covering trip booking, navigation, earnings visibility, and onboarding flows.
- Built operational dashboards for fleet owners to manage vehicles, driver assignments, and live status tracking, translating complex logistics workflows into structured, actionable interfaces.
- Established a scalable Figma design system with reusable components and interaction patterns, ensuring consistency across all real-time, data-driven screens.
- Partnered with engineering in agile sprints to deliver annotated, production-ready Figma specs aligned with development constraints.
- Led usability testing and design iteration cycles, incorporating driver and rider feedback to reduce onboarding friction and improve task completion.

Product Designer (Contract) — [Prodeegi](#)

Oct 2024 – Apr 2025

Lagos, Nigeria (Remote)

- Led end-to-end product design for Clyent Portal — a task and workflow management platform — including user flows, dashboards, and multi-step configuration screens.
- Designed the Veesitor mobile app for visitor management and access control, defining user journeys and structuring interfaces for clarity on mobile devices.
- Built reusable UI component libraries to support feature expansion without redesigning from scratch, reducing future design overhead.
- Delivered a marketing website aligned with product experience and brand direction, collaborating closely with engineers throughout implementation.

Product Designer — [Wigi Software](#)

Jun 2021 – Oct 2024

Lagos, Nigeria

FUURAI — AI-Powered Pet Behaviour App

- Designed mobile UX that translated AI-generated sound recognition and breed identification outputs into simple, actionable insights for everyday users.
- Structured dashboards for pet health history tracking, and designed clear feedback states for real-time AI analysis (scanning, learning, returning results).

SNAPAM — AI Conversational Fintech (WhatsApp-native)

- Designed chat-first UX patterns enabling users to manage financial transactions directly in WhatsApp, eliminating the need for a standalone app.
- Collaborated with AI engineers to build intent-driven user flows and interaction models for a conversational money assistant embedded in a messaging platform.

SPECAI — AI Computer Vision / TrustTech

- Designed AI-assisted verification workflows using computer vision and spectral data to authenticate alcoholic beverages in real time — translating ML outputs into clear trust signals for non-technical users.
- Worked cross-functionally with data science teams to align UX decisions with model capabilities across a global beverage dataset.

Product Designer (Contract) — [Invessa](#)

Sep 2023 – Jan 2024

Lagos, Nigeria (Remote)

- Designed UX for a peer-to-peer lending platform, structuring loan request, approval, and repayment flows to make complex financial interactions clear and guided.
- Maintained consistent layout and interaction patterns across dashboards and transaction screens, aligned with platform logic and risk controls.

Product Design Intern — [Qualiro](#)

Sep 2020 – Mar 2021

United States (Remote)

- Designed and prototyped the company website and internal tools; contributed to an Electronic Quality Management System interface and a learning platform layout.
